PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 1+ years of experience designing, developing, and maintaining scalable systems using Python, Node.js, and distributed architectures. Skilled in microservices, system configuration, SQL/NoSQL databases, and event-driven systems (Kafka, AWS SQS). Experienced deploying applications on AWS with Docker and CI/CD pipelines. Strong focus on troubleshooting, building reliable APIs, and creating technical documentation.

TECHNICAL SKILLS

Languages & Backend: Python, JavaScript, Django, FastAPI, Node.js, C++

Databases & Messaging: PostgreSQL, MySQL, Redis, Apache Kafka, RabbitMQ

DevOps & Monitoring: AWS, GCP, Docker, CI/CD, Linux, Git, Grafana

Frontend: React, HTML5, CSS3

Tools: Swagger/OpenAPI (API Documentation), Pydantic

WORK EXPERIENCE

Backend Developer, OneRootFarm

Jul 2025 – Present

- Owned the development and maintenance of backend services for app and operations dashboards, including real-time monitoring and production issue resolution.
- Improved API response times by 2x by optimizing PostgreSQL queries and implementing pagination.
- Architected an asynchronous task system using RabbitMQ and Redis to manage background jobs and user notifications.
- Managed the full deployment lifecycle on AWS using Docker, enhancing scalability and release consistency.

Software Development Engineer 1, Sarva Suvidhaen Pvt. Ltd.

Sep 2024 – Jul 2025

- Developed and maintained backend microservices using NestJS and PostgreSQL for a real-time notification system.
- Created reusable notification templates and optimized API payloads to improve response time and system efficiency.
- Used Docker for containerization and set up CI/CD pipelines for smoother and faster deployments.
- Monitored application performance through Grafana dashboards and followed agile practices using Jira for task tracking.
- Built RESTful APIs for RailOps platform using Django and PostgreSQL with microservices architecture, improved api response by 2x by optimizing query.

SDE Intern, Sarva Suvidhaen Pvt. Ltd.

Jun 2024 – Aug 2024

- Improved data accuracy by 30% in the Railway Water Management System (RWMS) by co-developing data validation and reconciliation workflows.
- Strengthened system reliability by implementing robust data validation, ensuring transactional consistency, and securing APIs.

PROJECTS

Book Review System

[GitHub Repo](#)

Ensured code quality and reliability by achieving 80%+ test coverage with Pytest and publishing technical API documentation via Swagger.

Railway Management API

[GitHub Repo](#)

Built a secure Django REST Framework API with JWT authentication, role-based access control, and reconciliation-ready booking workflows.

EDUCATION

B.Tech in Computer Science and Engineering, Darbhanga College of Engineering

2020–2024

CGPA: 7.97/10 Relevant Coursework: Data Structures, Algorithms, Database Management, Operating Systems, Software Engineering
